

The wheel of the Noto antenna

How much...

...time?

We trust in about one year
(working by the session 3/2011)

...money?

Who knows? 500 – 800 kEuro
(Sandro Orfei at work...)

Just to not twiddle our thumbs

- tune up the receivers (cal, sensitivity...)
- optical fiber connection
- DBBCs
- some work on new receivers (X-Ka,SLX)
- anything else we will think about
